

We are looking for a research assistant for the Cottbus project office to join our dedicated team in the Intelligent Networks research area.

Research Assistant (m/f/d)

(40 hours per month, initially for a fixed term of 3 months)

Participation in the AI-DISCO project by assisting with application-oriented research on the preparation, conduct, and documentation of scientific experiments.

Your tasks:

- AI-supported, model-based, and conventional implementation of software concepts
- Research and synthesis of findings from the literature
- Evaluation of research findings and approaches from the literature

Your qualifications:

- You have an interest in scientific work
- You can familiarize yourself with new topics on your own
- Willingness to work both as part of a team and independently
- Communication and presentation skills in German and English

Your benefits:

- Insights into current research in the field of artificial intelligence
- Personalized guidance and support to help you expand your skills
- Compatibility with your studies

Individual point:

- Position available immediately
- Opportunity for a work-study position
- Opportunities for research projects, bachelor's theses, and master's theses

We look forward to receiving your detailed application materials, including your earliest possible start date.

Please send your application materials by email to jan.novacek@dfki.de.

If you have any questions, you can reach me at [+49 631 2057 57092](tel:+49631205757092).

The German Research Center for Artificial Intelligence (DFKI) has operated as a non-profit, Public-Private-Partnership (PPP) since 1988. DFKI combines scientific excellence and commercially-oriented value creation with social awareness and is recognized as a major "Center of Excellence" by the international scientific community. In the field of artificial intelligence, DFKI has focused on the goal of human-centric AI for more than 35 years. Research is committed to essential, future-oriented areas of application and socially relevant topics.

DFKI encourages applications from people with disability; DFKI intends to increase the proportion of female employees in the field of science and encourages women to apply for this position.
